

I am Prashant Balasaheb Pund, resident of village - Gaajarwadi, Tal - Niphad, Dist. - Nashik. Having - 40 Acre land holding. with major cultivation of Grapes, pomegranate, sugarcane & onion. I have tried & tested 'P-Rise' (phosphate solubilizing bacterial) product from Plant Biotics company. ~~It~~ in Pomegranate cv. Fule-Bhagwa. at 'Lemon size' fruit stage. @ 2 kg/Acre. After using 'P-Rise', I have noticed following positive results in fruit quality compared to ~~to~~ Untreated block.

- 1) Increase in Fruit size upto 20-25 mm.
- 2) Increase in fruit weight upto 60-70 gms.
- 3) Overall plant growth is good.

I am very satisfied with performance of the product. Farmers should use this product to get better results of the chemical fertilizers & improve soil health.

with Best

Best Regards,

PBund

Mob. no: +91 9850313865
crop. : Tomatoe,
product : P'rise.

I am farmer having 22 acres of Agriculture Land. Cultivated under tomato, Grapes, Onion, Bittergourd. I had used 'P'rise' (PSB) from 'plantbiotech' company in tomato at 30 days after transplanting @ 1kg/1 block. I have observed following difference in treated block as compared to Untreated.

- 1] More no. of healthy secondary branches.
- 2] Good fruit setting.
- 3] size of the fruit is bigger
- 4] Increase in yield.

I am very satisfied with the performance of 'P'rise', I recommend farmers to use this product to get higher yield and better quality fruits.

Best Compliments.
Kiran Harak.
