

SOIL VITALIZER - SUPER NATURAL BIOPOLYMER TO ENHANCE NUTRITION DELIVERY & MICROBIAL ACTIVITY

KEY BENEFITS

- Fastens maturity
- Excellent fertilizer synergist
- Stores excess nutrients in the soil and release nutrients gradually over a period of time
- Helps in reducing chemical fertilizer requirement
- Improves nitrogen fertilizers use efficiency
- Increases crop yield and hasten maturity
- Make the crop healthy against the diseases and drought
- Increased water availability to plants

SPECIAL CARE SHOULD BE TAKEN WHEN TANK MIXING

- Use appropriate dosages of formulation as per recommendation.
- Partially fill the spray tank with clean water and then add the specific amount of Bio-product to the tank. Add the remaining water and mix THOROUGHLY.
- DO NOT LET MIXTURE STAND OVERNIGHT.
- DO NOT mix with copper-based fungicides, bactericides, concentrated acids such as sulfuric acid, solvents and oxidizing agents.
- Application in the early morning OR evening creates conditions favourable for germination of spores, giving better results.

The absorption of nutrient molecules by BP-100[®] is 100 fold as strong as soil alone, which thus decreases the loss of nutrients from the soil.

Formulation	: Liquid
Shelf life	: 2 Years
Packing	: 5 kg

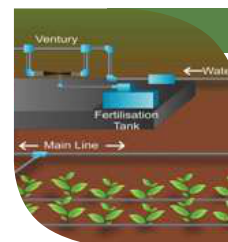

USAGE GUIDELINES

DRENCHING

Calculate the volume of water required for drenching to the number of plants in the desired area. Add the recommended dose of formulation in the water and drench it in root zone.

FERTIGATION

It is completely soluble in water giving advantage for easy and labor saving application through drip irrigation system. Mix recommended dose of formulation in ample amount of water and apply to the desired area.
