

KEY BENEFITS

- Provides essential nutrients along with silica for essential growth of the crops
- Increase quality of produce (size, taste & shelf-life)
- Healthier crops with vigorous plant growth
- Improves photosynthetic and metabolic activities of plant
- Increases numbers of flower, fruits and yield

USAGE GUIDELINES

FOLIAR APPLICATION

Rapid uptake of nutrients applied to crop foliage ensures a faster response within the plant as micronutrients directly enter the metabolic process. 2 gm FruitUp per lit of water should be used as foliar spray. Apply in sufficient water to provide good coverage. Use 300-400 lit water to spray one acre field. Frequency of foliar spray depends on the crop stage at 15-20 days interval or as needed.

APPLICATION TIME

FruitUp should be applied at critical stages in crop life cycle to enhance plant performance and yield.

- Vegetative growth stage
- Pre-bloom stage/flowering
- Fruit setting and fruit development stage
- Maturity

INCREASES FRUIT SIZE, QUALITY AND YIELD

Nanotechnology driven formulation for healthier crops & fruit quality

- FruitUp is unique combination plant nutrient sourced from natural minerals
- It enhances photosynthetic and metabolic activities in plant and also improves fruit quality and yield

Formulation: Powder
(Soluble Free Flowing Powder)
Shelf life: 2 years
Packing: 500 gram

SPECIAL CARE SHOULD BE TAKEN WHEN TANK MIXING

- Use appropriate dosages of formulation as per recommendation.
- Partially fill the spray tank with clean water and then add the specific amount of Bio-product to the tank. Add the remaining water and mix THOROUGHLY.
- DO NOT LET MIXTURE STAND OVERNIGHT.
- DO NOT mix with copper-based fungicides, bactericides, concentrated acids such as sulfuric acid, solvents and oxidizing agents.
- Application in the early morning OR evening creates conditions favourable for germination of spores, giving better results.
