

**CARRIER-BASED CONSORTIA OF NITROGEN FIXING BACTERIA, PHOSPHATE SOLUBILIZING BACTERIA & POTASH MOBILIZING BACTERIA**

## KEY BENEFITS

- Improves availability of Nitrogen, Phosphorus and Potash to plants.
- Helps to give healthy and vigorous growth to plants.
- Improves the development of flowers and fruits in crops.
- Improves size, color & quality of fruits and grains.
- Helps in increasing crop yield with better quality.

## USAGE GUIDELINES

### BROADCASTING

Mix the recommended quantity of bio-products in 50 kg of well-decomposed FYM/ Compost and broadcast in the field.

### DRENCHING

Calculate the volume of water required for drenching to the number of plants in the desired area. Add the recommended dose of formulation in the water and drench it in the root zone of crops.

### FERTIGATION

It is completely soluble in water giving an advantage for easy and labor-saving application through drip irrigation systems. Mix the recommended dose of formulation in the required amount of water and apply it to the desired area

### SEED TREATMENT

Can be applied as a water-based slurry to cover seeds uniformly.

NutriUp contains Nitrogen Fixing Bacteria, Phosphate solubilizing bacteria, and Potassium Mobilizing Bacteria, which enhances the bioavailability of Nitrogen, phosphorus, and potash.

<b>Formulation</b>	<b>Powder (Soluble Free Flowing Powder)</b>
<b>Shelf life</b>	<b>2 years</b>
<b>Packing</b>	<b>100 g and 200 g</b>

## SPECIAL CARE SHOULD BE TAKEN WHEN TANK MIXING

- Use appropriate dosages of formulation as per recommendation.
- Partially fill the spray tank with clean water and then add the specific amount of Bio-product to the tank. Add the remaining water and mix THOROUGHLY.
- DO NOT LET MIXTURE STAND OVERNIGHT.
- DO NOT mix with copper-based fungicides, bactericides, concentrated acids such as sulfuric acid, solvents and oxidizing agents.
- Application in the early morning OR evening creates conditions favourable for germination of spores, giving better results.
