

**A PLANT SUPPLEMENT ENRICHED WITH NATURAL ENZYMES FOR STRONGER AND HEALTHY PLANTS**

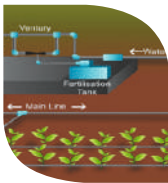

## KEY BENEFITS

- Improves plant vigour and health
- Improves nutritional uptake of plants
- Improves crop yield and produce quality
- It enhances photosynthetic and metabolic activities in plants.
- Stimulates beneficial soil microbial activity

## USAGE GUIDELINES

### FERTIGATION

It is completely soluble in water giving an advantage for easy and labour-saving application through drip irrigation systems. Mix the recommended dose of formulation in the required amount of water and apply it to the desired area

### DRENCHING

Calculate the volume of water required for drenching to the number of plants in the desired area. Add the recommended dose of formulation in the water and drench it in the root zone of crops.

## SPECIAL CARE SHOULD BE TAKEN WHEN TANK MIXING

- Use appropriate dosages of formulation as per recommendation.
- Partially fill the spray tank with clean water and then add the specific amount of Bio-product to the tank. Add the remaining water and mix THOROUGHLY.
- DO NOT LET MIXTURE STAND OVERNIGHT.
- DO NOT mix with copper-based fungicides, bactericides, concentrated acids such as sulfuric acid, solvents and oxidizing agents.
- Application in the early morning OR evening creates conditions favourable for germination of spores, giving better results.

## IMPROVES SOIL HEALTH AND CROP YIELD

SoilRevive is unique formulation of plant growth promoting enzymes mixed with portion of potassium humate.

It is produced using Ultra Filtration Technology of the fermented broth

<b>Formulation</b>	: Liquid
<b>Shelf life</b>	: 18 months
<b>Packing</b>	: 2 kg
